

HELEN BENNETT, CORTEZ

---

“Before my surgery at Mercy Regional Medical Center I had severe pain in my right thigh and hip. I couldn’t get any ease from prescribed pain pills or ice packs. After my XLIF procedure, the pain on my right side was gone, and three weeks after my surgery, I had increased my [rehabilitative] walking to five miles a day, which I continue to do today. I am so thankful for Dr. Youssef and his associates for their knowledge and skills, and also the nurses for their special care at Mercy. We are very blessed to have these resources in our area.”
