

JOHN TURGEON, BAYFIELD

---

“Without this procedure, my passion for life would have been done. I had constant lower back pain and I couldn’t work or sleep, much less climb. But now I feel like I’m 25 again. Three months after surgery, I nearly summited Mt. McKinley carrying a 50-pound pack and and I hope to climb Everest in 2011. It’s hard to put into words how well [Dr. Youssef] did, but what I really appreciate is that he treated me like a friend, not just a patient.”
